

# Planning the perfect interior?

Don't  
forget the  
finishing  
touch

At Schneider Electric we've taken the humble light switch to new levels. We've considered every angle and reviewed a multitude of technological advances, to ensure that our range is as functionally brilliant, as it is visually appealing.

Expect more from a light switch – we do.

## 600 SERIES & SLIMLINE CLASSICLY GOOD

The 600 Series has been specifically designed for New Zealand conditions, ensuring that the durable plastic won't discolour in our harsh sunlight. This has been the country's most popular range for more than a decade.

Slimline's classic good looks have been sliced extra thin. In fact these are among the thinnest switch plates in the world. So if you like your technology flush with your decor there's no better solution.

## MODENA & STRATO 800 SERIES™ WHEN GOOD BECOMES BETTER

Modena's seductively curved picture frame surrounds are interchangeable, presenting 18 creative ways to frame up new and existing wiring installations.

The Strato 800 Series offers European style switching and socket modules within a sleek and slim metal surround. The standard module configurations make it easy to change each technology interface to evolving requirements.
