

New Zealand's most universal USB charging mech

Adaptability + Efficiency + Performance = Perfect Charging Solution

Regardless of the project, from commercial offices, hotels and public spaces to residential homes, we have a USB charging solution to fit your needs. The charger's compact and modular design supports retrofit as well as new builds and can simply be adapted to any plate of your choice – perfect next to bedside tables, in home offices and any place where device charging is most convenient!. Schneider Electric offers comprehensive USB charging solutions in the leading PDL and Clipsal ranges with the quality and reliability you can trust.

Adaptability

- ✓ Modular design makes it easy to clip into a wide variety of plates in the PDL or Clipsal ranges
- ✓ 10 interchangeable front fascia colours provides a seamless integration into existing offers
- ✓ Can be simply fitted into existing installations with up to 3 chargers per plate
- ✓ Easy installation as the compact size provides flexibility in tight wall spaces

Efficiency

- ✓ Able to reduce overall system load and infrastructure by replacing standard sockets with USB chargers
- ✓ Meets five-star energy ratings for efficiency with extremely low standby power (<0.07W)
- ✓ Cable compensation allows optimised charging of your device

Performance

- ✓ Provides up to 1.2 amps charging of leading brands of phones, tablets, cameras and eReaders
- ✓ Inbuilt protection for surge, over-temperature and over-current occurrences
- ✓ Certified to all relevant safety and EMC standards for New Zealand, meets BCS1.2 USB charging specification

Specifications

Specification	Description/Value
Supply voltage	230-240v AC, nominal
Supply frequency	50Hz
Output voltage	4.75-5.25V DC
Standby Power	<0.07W
Application	USB battery charger for portable USB devices
Input connections	2-wire polarised input includes screw-in terminal connector RED-active/line; BLK-neutral; lead length ~110mm
